

# **BlueBlooded Sprint 2 Planning Document**

*Luke Smith*

## **Sprint Overview**

After putting together authentication and a fairly functional discussion board, this sprint will continue to build on the foundation by building the baseline for key features. Discussion board comments will be implemented along with liking, along with a podcast host for streaming the BlueBlooded podcast. Finally, we hope to get the admin account defining up and running, allowing admins to have special features that normal users will not have.

## **Risks and Challenges:**

Building the podcast host will be the most challenging part for this sprint. Reset password, changing details, and replying are not far off from being done, but the podcast host will be done from scratch and it is something new for my development career. It will bring a lot of new challenges with in app hosting of long form content, and will require a lot of troubleshooting to make sure

nothing breaks. Admin also may be challenging initially, but once in place and effective, it should be easy to use.

# Current Sprint Detail

## User Story 3

As a user, I would like to reset my password.

| Number | Description                             | Estimated Time |
|--------|-----------------------------------------|----------------|
| 1      | Test acceptance criteria with dev build | 1 Hour         |

Acceptance Criteria:

- Can't reset with the same password
- Can sign in with the new password
- Can not sign in with the old password

## User Story 6

As a user, I would like to be able to like comments or replies that I find worthy.

| Number | Description                                                   | Estimated Time |
|--------|---------------------------------------------------------------|----------------|
| 1      | Add like button UI to comment and reply components            | 1.5 Hours      |
| 2      | Insert/delete like from Supabase on press, show current likes | 1.5 Hours      |
| 3      | Reflect liked state per user                                  | 1.5 Hours      |

Acceptance Criteria:

- Users can like a comment
- Users can like a reply

## User Story 7

As a user, I would like to be able to change details of my profile, such as school, username, bio, etc. (Settings)

| Number | Description                                               | Estimated Time |
|--------|-----------------------------------------------------------|----------------|
| 1      | Fetch current profile data on screen load and fill fields | 1 Hour         |
| 2      | Save changes to Supabase and reflect changes in UI        | 1.5 Hours      |

Acceptance Criteria:

- School is changeable

## User Story 8

As a user, I would like to be able to search or filter threads by category

| Number | Description                                                              | Estimated Time |
|--------|--------------------------------------------------------------------------|----------------|
| 1      | Confirm categories match what is found in Supabase                       | 0.5 Hours      |
| 2      | Connect existing filter modal to active filter state in CommunityContext | 1 Hour         |
| 3      | Pass active filter to Supabase threads query                             | 1 Hour         |
| 4      | Handle empty state where nothing matches the current filter              | 0.5 Hours      |

Acceptance Criteria:

- Users are able to filter or search in the discussion post tab
- Given filters accurately filter to the desired discussion posts
- Filters that have no corresponding topics should not display anything

## User Story 9

As a user, I would like to be able to watch the most recent episode of the BlueBlooded podcast

| Number | Description                                                                      | Estimated Time |
|--------|----------------------------------------------------------------------------------|----------------|
| 1      | Set up YouTube Data API key in Google Cloud Console                              | 0.5 Hours      |
| 2      | Fetch Ryan Hammer's uploads via YouTube Data API                                 | 1 Hour         |
| 3      | Build podcast card which features most recent episode                            | 1.5 Hours      |
| 4      | Integrate react-native-youtube-iframe for in app playback of most recent episode | 1 Hour         |

Acceptance Criteria:

- Episodes of BlueBlooded are available to be seen
- The most recent episode is accurately displayed at the top

## User Story 10

As a user, I would like to be able to rewatch older episodes of the BlueBlooded podcast

| Number | Description                                                         | Estimated Time |
|--------|---------------------------------------------------------------------|----------------|
| 1      | Paginate YouTube Data API response to retrieve full episode list    | 1 Hour         |
| 2      | Build scrollable episode list below featured, from newest to oldest | 1.5 Hours      |
| 3      | Build screen for episode details; description, publish              | 1.5 Hours      |

|   |                              |           |
|---|------------------------------|-----------|
|   | date, title                  |           |
| 4 | Handle load and error states | 0.5 Hours |

Acceptance Criteria:

- Users see older episodes of BlueBlooded
- Users can watch them with no issue
- They are sorted from newest to oldest

## User Story 11

As an admin, I would like to be able to delete discussion posts or comments that are inappropriate for the app.

| Number | Description                                                            | Estimated Time |
|--------|------------------------------------------------------------------------|----------------|
| 1      | Add is_admin boolean column to users table                             | 0.5 Hours      |
| 2      | Expose is_admin via useAuth() hook for UI purposes                     | 0.5 Hours      |
| 3      | Add delete button to post pill and comments only for admins            | 1 Hour         |
| 4      | Wire delete to Supabase, confirm posts and comments disappear properly | 1 Hour         |

Acceptance Criteria:

- All discussion posts can be deleted by admins
- All comments can be deleted by admins
- Deleted comments/posts disappear for users

## User Story 12

As a user, I would like to reply to a discussion post via a comment

| Number | Description                                                                        | Estimated Time |
|--------|------------------------------------------------------------------------------------|----------------|
| 1      | Create UI button on post pill for commenting                                       | 1 Hour         |
| 2      | Design and seed comments table                                                     | 1 Hour         |
| 3      | Insert comment to Supabase on submit, clear input, and add to list                 | 1 Hour         |
| 4      | Fetch and display existing comments on screen load, use real time for new comments | 1.5 Hours      |

Acceptance Criteria:

- Users have the option to reply to a discussion post
- The text input is correctly displayed

- Other users can see the reply
